

ABOUT

MACI is an agricultural cooperative association created to promote and provide agriculture tours and educational services for domestic and international audiences. The strength of MACI is built upon knowledge, education, and the experience of its members who are, or have been, full-time practitioners in their respective professions.

The CVB is a liaison to the hotels in Fargo, Moorhead and West Fargo, and a city reference for information about the area.

SERVICES

Mid-America Consultants International (MACI), together with the Fargo-Moorhead Convention & Visitors Bureau (CVB) provides ag tours & educational programs designed to address specific issues and interests.

Services include, but are not limited to, short-term (2-4 days) and in-depth (1-3 week) agricultural study tours. Tours can accommodate groups of various sizes.

MACI and the CVB will organize tour itineraries, interpreters, transportation, food and lodging, specifically for the needs of your group.

- Probstfield Farm

AG IN THE F-M AREA

The Fargo-Moorhead area has a proud history of agriculture, cultivating diverse companies and programs that continue to support the growth of the agriculture industry in the United States and around the world.

Located in the center of North America, the Red River Valley stretches over 30 miles, gently rising west of the Red River, a north-flowing river running between North Dakota and Minnesota, and extending into Canada. Rich, black soil produces an abundance of crops such as potatoes, sunflowers, sugar beets, wheat, corn, soybeans, alfalfa, oats and lentils. Industry and agriculture are closely related in Fargo-Moorhead. The area has meat-packaging plants, sugar and sunflower processing plants, creameries and a malting barley plant.

The spirit of the early pioneers remains a treasured part of our proud heritage. We continue to build on our colorful past as we look forward to the promise of the future.
